Light rain	Light rain showers	Heavy rain showers	Heavy rain showers	Heavy rain showers (night)	Heavy rain showers (night)
Precipitation probability					
60%	60%	40%	60%	40%	30%

Forecast for Saturday 19 Dec 2020

Weather: Bands of blustery showers will push across the Peak District today, some showers may group together to give longer periods of rain. Some of the showers will be heavy with the risk of hail and thunder at times. There will be occasional brighter or sunny intervals in-between the shower bands, also clear spells.

Chance of cloud free mountain/hill tops above 600m: 70%, as scattered cloud will shroud the hill tops at times especially during heavier showers but this cloud cover will be temporary, except on some of the peaks across the west of the Peak District where cloud may linger for much of the day around 500m.

Visibility: Visibility will be good or very good outside of the showers, decreasing moderate or poor at times with the showers, and very poor with any hill fog.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Strong winds, with gales possibly over the highest ground and exposed ridges, especially near heavy showers. Note the freezing level lowering during today, helping to make it feel colder.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Sat 19 Dec 2020	6.8mm	10.8mm	20.8mm

Forecast for Sunday 20 Dec 2020

Weather: Scattered blustery showers will push across the Peak District some showers heavy, with the risk of hail and thunder at times, especially overnight and through the morning. There will be occasional brighter or sunny intervals in-between the shower bands, also clear spells. Becoming largely dry with clear periods through the evening.

Maximum wind: Southwesterly 30mph gusts 40-45 mph at first, then slowly easing a little.

Chance of cloud free mountain/hill tops above 600m: 70%, as scattered cloud will shroud the hill tops at times especially during heavier showers but this cloud cover will be temporary. Becoming generally 90% through the evening.

Visibility: Visibility will be good or very good outside of the showers, decreasing moderate or poor at times with the showers, and very poor with any hill fog.

Temperature: **Valleys:** Plus 2 increasing 8 Celsius
At 600m: Plus 2 Celsius.
Freezing level: Above the summits
